Highly motivated Front-End Developer with 5 years of experience building responsive and user-friendly web applications using React, TypeScript, and modern JavaScript frameworks. Proven ability to improve user engagement and deliver high-quality code in Agile environments. Seeking a challenging front-end role where I can leverage my skills to create innovative and impactful user experiences.

Experience

Opentext (Software Engineer)

2024 - present

- Revamped the customer and partner portal homepage using ReactJS and TypeScript, resulting in a 25% increase in user engagement.
- Key contributions include a comprehensive refactor of legacy JavaScript code to TypeScript within the customer and partner portals, enhancing code maintainability, improving application performance, and enabling faster resolution of critical customer-reported bugs and hotfixes. This effort resulted in a more stable and scalable front-end architecture.
- Proactively addressed security vulnerabilities by conducting Proof-of-Concept (POC) implementations and thorough analysis, identifying and mitigating potential risks within the front-end codebase.

Oracle Cerner Healthcare Solutions PVT LTD

2019-2024

Software Engineer 2

- Developed responsive and accessible user interfaces for Healthlife applications using React, ensuring cross-browser compatibility and optimal performance.
- Implemented interactive data visualizations using D3.js to display historical health data, including risk indicators and graphical trends, enabling users to identify potential health conditions like diabetes and heart disease.
- Led the development of Admin Tooling Console using React, enabling clients to configure website data through a dynamic UI, integrating both the API gem and UI package.
- Conducted operational reviews to enhance product performance, achieving 95% uptime for client solutions.
- Configured and deployed applications to different environments using Spinnaker, ensuring 99.99% uptime for client solutions.

Skills

- Languages: HTML, CSS, JavaScript (ES6+), TypeScript
- Frameworks/Libraries: React, Redux, Bootstrap, D3.js, Context API, Styled Components
- Testing frameworks: Jest, Enzyme, Storybook
- Tools: JIRA, Jenkins, Docker, Splunk, NewRelic, CI/CD, GitHub, GitLab
- Databases: MySQL, MongoDB
- Other: REST API, Agile, Scrum, Microservices, Webpack, NPM, Data Structures and Algorithms, Accessibility, Internationalization, Debugging and Logs monitoring.
